

brake run at the mr. roboto project 6/2/2024

MEXICO, and COLANDREA are all related to get some variation of the VEKOMA TITL next year alongside CEDAR POINT) SIX FLAGS OVER GEORGIA is also making a splash next year with GEORGIA SURFER that kind of seems like a bigger rip-off of something like ZAMPERIA DISKO, cool, but not my quite my style. I can see why others would like this coaster world.....ALPENHURY (premier rides sky rocket, canada's wonderland) WRAITH OF RAKSHASA (B&M dive, six flags great america) DON'T HATE ME If I missed anything good, this is just a cursory rundown of rode, the rest of the time is pics from the show we had earlier this year with you guys, swampwalk, and the operating VEKOMA TITL in the world as of publishing, but SIX FLAGS DIDDIA, SIX FLAGS

this is my first zine back after a much needed break. I got a new job, expanded my pedalboard ten-fold, and ramped down brake run live shows for now. Brad's still in florida and we just need a second to work on the record. recording should commence soon, so keep an eye on that. In the coaster world, the off-season means new projects are a-brewing. INTIMIDATOR or PROJECT 205 is now PANTHERIA... which is now too close to PANTHEON for my own liking. KINGS DOMINION announced RAPTERA, a B&M WING COASTER a la GATKEPPER at cedar point -- speaking of which, they have a new coaster being added to their coltath of a roster as well. SIREN'S CURSE, a VEKOMA TITL, the likes of which can only currently be seen at LITPAO LAND in taiwan. (I is the holy operating VEKOMA TITL in the world as of publishing, but SIX FLAGS DIDDIA, SIX FLAGS
